Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamashita et al (cited by the Applicant, 5894717).

Prior art discloses:

Claim 17:

A mower deck comprising a top, sides, cutting chamber, front & rear, interior & outermost exterior surfaces, blade (fig 4);

Discharge (21);

An insert, fastener, a portion of which is positioned adjacent to the outermost exterior surface wall of the rear portion of the sidewall (ref 38; col. 10, ln 34-44);

Claim 18:

Can be coupled via a single fastener (see fig 7);

The rear portion of the sidewall include a guide member 36a & b);

Claims 19-20:

Art Unit: 3671

A mulch ramp & discharge opening orientation with respect to the blade rotation in line with air & grass flow (either ref 44 or the bent forward portion of the mower deck as shown in fig 1 can act as a ramp to direct grass towards an inner portion of the top surface, also see fig 11, ref 52, showing the downwardly directed discharge wind).

Response to Arguments

3. Applicant's arguments filed with amendments to claims 17-20 on 8/17/2005 have been fully considered but they are not persuasive.

Applicant's argument that the insert that is capable of being attached to the outermost exterior surface is not met by the prior art, the Examiner would point out that firstly the insert needs to be capable of being attached (i.e. "attachable"), and secondly the rear portion of the sidewall is not claimed as being two separate walls, therefore, the inner, the cutting chamber side of the wall is considered the "inner" whereas the other side is considered the "outermost exterior surface."

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
